

# AFT100

## TRACTOR MOUNTED TRENCHER

Efficient drainage is one of the most cost effective ways of improving crop yields and to keep your land accessible for machines.

The AFT100 enables you to dig perfectly graded trenches up to ten times faster than a backhoe or excavator and at a fraction of the cost of larger self-propelled machines.

# AFT 100 AGRICULTURAL

**Trench widths are easily adaptable from 125mm to 400mm with digging booms for depths of up to 1.8m (71")**

**Cuts the narrowest trench needed and thus reduces the costs of reinstatement and backfill materials**

**Twin soil augers place the soil close to both sides of the trench for easy backfilling**

**Hydraulic depth control: manual or by laser for fully automatic grading**

**A range of pipe chutes, reel carriers and backfilling equipment is available**

**Mounted on a standard tractor, it only costs a fraction of the price of comparable self propelled trenchers**

## **Tractor requirements:**

100hp plus, fitted with a Creeper gearbox or hydrostatic transmission.
